

WHAT IS IPTV?

INTERNET PROTOCOL
TELEVISION (IPTV) PROVIDES
TELEVISION CONTENT OVER A
COMPUTER NETWORK
THROUGHOUT YOUR BUILDING.

You can now
combine your TV
and computer
systems in one.
IPTV provides
more options at
a low cost!

LEVERAGING YOUR EXISTING LAN (LOCAL AREA NETWORK) TO DISTRIBUTE TV SIGNALS TO TV AND PC SCREENS WILL SIGNIFICANTLY CUT COSTS. AN IPTV SYSTEM ELIMINATES THE NEED FOR A COSTLY COAX NETWORK AND ENABLES COST EFFECTIVE DISTRIBUTION ACROSS ONE OR MANY FLOORS AND ROOMS IN YOUR BUILDING. IPTV ALLOWS YOU TO TRANSMIT LIVE OR PRE-RECORDED TV & VIDEO.
